Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 13-24, 29-39, 45-56 and 61-64, drawn to a core shell polymer and a method of making, classified in class 523 and 524, subclass 200+ and 504+.
- II. Claims 25-28 and 57-60, drawn to a blend of drag reducers, classified in class 523, subclass 175+.
- III. Claim 65, drawn to a method of making a particulate compound, classified in class 523 and 524, subclass 200+ and 504+.
- IV. Claim 66, drawn to a method of making a particulate compound, classified in class 523 and 524, subclass 200+ and 504+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the shell of Group I could have an outer diameter of less than 5000 microns and encompasses polymers other than polyalpha olefin. The subcombination has separate utility such as a rheology modifier in paints.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the core-shell polymer of Group II does not requires that of Group I. The subcombination has separate utility such as a rheolody modifier in paints.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II-IV is not required for Group I-III, respectively, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Mossman on October 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. The file lists telephone No. (915)-392-8015 and a message said the area code has been changed to (325) when the examiner dialed. However, (325)-392-8015 is not in service and the PTO's PALM does not show any information regarding an attorney.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1714

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H Yoon whose telephone number is (703) 308-2389. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (703) 306-2777. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
